# Cash Is No Longer King

The Fed is ready to cut rates in 2024. Lock in yields while you can.

After the most extreme period of interest rate increases in more than 40 years, we are approaching a reversal from the Federal Reserve. Market expectations and Fed projections are showing at least one 25 basis point cut to the overnight rate in 2024. Though the exact timing of the first rate cut is uncertain, it is clear from comments by Chairman Powell and the Federal Reserve that lower interest rates are coming.

Now may be the right time to consider stepping out of cash and investing out the curve to lock in yields for an extended period. Additionally, longer term fixed income has historically outperformed cash for the 24-month period after the first Fed cut.

Date of First Rate Cut	Date of Last Rate Cut	PERFORMANCE BETWEEN FIRST AND LAST RATE CUT			24-MONTH PERFORMANCE AFTER FIRST RATE CUT		
		ICE BofA US 3-Month Treasury Bill Index	Bloomberg Municipal Bond Index	Bloomberg Corporate Bond Index	ICE BofA US 3-Month Treasury Bill Index	Bloomberg Municipal Bond Index	Bloomberg Corporate Bond Index
6/5/1989	9/4/1992	23.69%	32.74%	38.40%	16.18%	16.55%	20.37%
7/6/1995	11/17/1998	16.75%	27.76%	26.35%	11.18%	14.36%	14.42%
1/3/2001	6/25/2003	6.81%	19.56%	31.14%	6.17%	14.39%	19.83%
9/18/2007	12/15/2008	3.28%	-5.52%	-6.48%	3.47%	11.36%	13.55%
7/31/2019	3/16/2020	1.40%	0.16%	1.72%	1.54%	8.82%	14.03%
	<b>Average</b>	<b>10.39%</b>	<b>14.94%</b>	<b>18.23%</b>	<b>7.71%</b>	<b>13.10%</b>	<b>16.44%</b>

## The Parametric difference

### PERSONALIZED PORTFOLIOS

A wide range of customization options allows for a targeted allocation to match each individual client's risk-and-return profile.

### ADVANCED TECHNOLOGY

Parametric's proprietary technology efficiently identifies the most attractive securities and optimizes the overall bond investing process.

### TAX EFFICIENCY

We aim for enhanced after-tax returns through our differentiated year-round tax-loss harvesting, which focuses on minimizing transaction costs and cash drag.

### EXCEPTIONAL CLIENT SERVICE

Direct access to the portfolio management team helps keep investors and advisors connected and on top of market insights and recommendations.

Corporate debt securities are subject to the risk of the issuer's inability to meet principal and interest payments on the obligation and may also be subject to price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer, and general market liquidity. When interest rates rise,

the value of corporate debt securities can be expected to decline. Debt securities with longer maturities tend to be more sensitive to interest rate movements than those with shorter maturities. Company defaults can impact the level of returns generated by corporate debt securities. An unexpected default can reduce income and the capital value of a corporate debt security. Furthermore, market expectations regarding economic conditions and the likely number of corporate defaults may impact the value of corporate debt securities.

An imbalance in supply and demand in the municipal market may result in valuation uncertainties and greater volatility, less liquidity, widening credit spreads, and a lack of price transparency in the market. There generally is limited public information about municipal issuers. As interest rates rise, the value of certain income investments is likely to decline. Longer-term bonds typically are more sensitive to interest-rate changes than shorter-term bonds. Investments in income securities may be affected by changes in the creditworthiness of the issuer and are subject to the risk of nonpayment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments.

Investment strategies that seek to enhance after-tax performance may be unable to fully realize strategic gains or harvest losses due to various factors. Market conditions may limit the ability to generate tax losses. Tax-loss harvesting involves the risks that the new investment could perform worse than the original investment and that transaction costs could offset the tax benefit. Also, a tax-managed strategy may cause a client portfolio to hold a security in order to achieve more favorable tax treatment or to sell a security in order to create tax losses. Prospective investors should consult with a tax or legal advisor before making any investment decision.
