Proposal Date: 4/11/2024

**Bethel Schools- Niagara Software Maintenance Agreement
Bethel, CT**

Existing Conditions: Bethel Public Schools currently has three schools (High School, Middle School & Berry Elementary School) on one Niagara Server and two schools (Johnson & Rockwell Elementary Schools) on a second server. None of these schools are on the current Niagara software version. Software Maintenance Agreements for all but one JACE have expired

Scope of work includes:

- ESC Shall provide additional server nodes to combine all five schools onto one Niagara 4 Server
 - Existing Server Hardware and IP Addresses will be used
- ESC shall provide three year software maintenance agreement (SMA) for supervisor software and (QTY 13) JACE Supervisory Controllers.
 - SMA will allow for the installation of latest Niagara version now and will also provide licensing for future version upgrades during the course of the three years
 - Labor to perform the current upgrades are included in this proposal
 - Labor to perform future upgrades will be covered under sperate three year service agreement
 - ESC shall backup databases for all five schools
- ESC shall install latest version of Niagara on server
- ESC shall upgrade software version on all 13 JACE Supervisory Controllers in the five schools
- Project supervision
- Floor plan graphics
- Trending and alarming
- 1 year warranty
- Work is to be performed during normal working hours

Exclusions and clarifications to this proposal:

- Excludes modification of existing system beyond scope described above
- Excludes provision, installation or repair of existing building automation supervisory controllers, field controllers and controls end devices
- Excludes provision of workstation computers, system can be accessed via any computer on Bethel School network with proper login credentials
- Existing Servers computer to be utilized
- Premium or overtime costs associated with overtime are not included
- Sales tax is NOT included
