Consideration of **Installation of new Mini-splits for I.T. Server Room**

I sent the attachments to you separately. Here's a little breakdown:

Base Installation	\$30,533
Electrical Work	\$4,775
Roofing Work	<u>\$1,275</u>
<i>Subtotal</i>	<i>\$36,583</i>
Contingency (<i>approx. 10%</i>)	<u>\$3,417</u>
Total Request	\$40,000

Eric M. Swenson

To: Dan Carter <carterd@bethel-ct.gov>, Richard Straiton <rcstrait07@gmail.com>, Bryan Terzian <bryan153@sbcglobal.net>, Brad Heering <heeringb@bethel-ct.gov>, MARTIN LAWLOR <martin.j.lawlor@snet.net>
Cc: Mary Churchill <churchillm@bethel-ct.gov>, Nick Cataldo <CataldoN@bethel-ct.gov>

Hopefully this table clarifies the question from last night:

	<u>Edgerton</u>	<u>ESC</u>	<u>B&D</u>
Base Price	\$23,497	\$28,035	\$30,533
Required Extras			
WiFi enabled	\$3,043	<i>included</i>	<i>included</i>
Roof mounting	Excluded	\$2,500	<i>included</i>
Total with required extras	\$26,540	\$30,535	\$30,533
Optional Extras			
Electrical Work	Excluded	\$6,824 if done by ESC	Excluded
Total	\$26,540	\$37,359	\$30,533

Since we want to do a roof mount, the comparison is between \$30,535 for ESC and \$30,533 for B&D with the required extras. The separate quote we got for wiring is less than the \$6824 for ESC to do the wiring, as I noted. Let me know if you have any further questions.
