Mushala, Paul		<p>Service Ticket:3818217 Summary:Bethel PD Firing Range Network Project Got onsite and checked range over and there are no cables run to destinations. Hvac guy said Electrician will be there at 11. I was also told they will be closing up the ceiling in the next couple days. Evan and electrician showed up at 11we went over what is needed and what the electrician was going to run. He ran one cable for the wireless and unknown to all there are home runs back to main computer room already previously run. He moved one box of them to the other side of the wall for me to use for the switch and AP. I mounted equipment and terminated 3 runs back to main and one for the AP. He did not run one for the Spectre equipment wireless even though I told him I think I am supposed to terminate that run too. The new AP is not showing up in Unleashed console so I tried updating the firmware to no avail. I got it updated from 10.10.x.x to 10.12.x.x but I upload the file it says processing and I never get the message to ok the upgrade. I started a case with Ruckus support and it is now resolved.</p>	6.50
