All payments by credit card are subject to a 3% processing fee.  
 Serving New England with locations in Massachusetts, Rhode Island, and Maine

## COMMENTS

### Call Details:

SIGNET respectfully offers the following to Bethel PD for the installation of Access Control on the new Range Door  
RANGE DOOR

- Furnish and install Corbin Russwin elec mortise lock, and Keedex door cord
- Furnish/install/program new card reader, request to exit, and door contact

### HEAD END

- Terminate in existing free V100 door port in MDF
- Existing core pipes through to floor below then to existing EMT in Sallyport area

### Solution:

While onsite I met with the electrician. He indicated that he had one more hole to drill for the access control wire run, we also located the pipe drop from the MDF. We examined to door and he stated that he was responsible for all raceways, and that he would provide the pipe drops for the door release and the reader feeds to the door.

02/21/24/SJG Pulled the wire from the MDF to the sally-port

02/22/24/SJG Completed the wire run through the sally port, continued into the door and terminated the door release, door status contact, Rex, and reader.

Completed terminations at the panel, V100 address C-3 Reader2. Note the aux output, for reader two, was previously connected to the sally-port overhead door and left as is for continued operation. Programed and tested. Door access was allowed to all per The LT. in charge of the range project.
